RE: MB Docket No. 15-149

Dear Chairman Wheeler,

The US Veterans Corps is an organization of military veterans performing hands on community service. Our Operation Coming Home program provides custom houses for troops injured in combat, and we have previously provided aid and relief after natural disasters. We are proud to partner with many organizations in our efforts and are grateful for the support we receive from sponsors. We are writing today in support of the Charter Communications, Time Warner Cable and Bright House Networks merger because we believe the company would be a great community partner in the future.

New Charter would prioritize community investment through numerous initiatives, including community service and inclusion programs. For example, New Charter would continue the program Charter Our Community, which is currently working to rebuild 25,000 unsafe homes by 2020. This work aligns with our Operation Coming Home efforts, and we are impressed with the company's substantial goals.

New Charter would specifically reach out to veterans through its inclusion initiatives. The company would offer veteran-owned businesses free seminars on joining the cable broadband supply chain. We appreciate New Charter's commitment to veterans, and believe many would benefit from this service.

We are confident New Charter would have a positive impact on the veteran community and local development. Please join us and support the merger.

If you have any questions please contact Andrew Ladner at 919-818-9609 or email aladner@myusvc.com.
